W3C CSS Validator results for <https://github.com/ebcheez/web-231/blob/main/site.css> (CSS level 3 + SVG)

**Sorry! We found the following errors (1114)**

URI : <https://github.githubassets.com/assets/dark-217d4f9c8e70.css>

1	Parse Error	(obj) => get_1.default(obj, path);
1	Parse Error	--color-checks-donut-error: #f85149;
1	Parse Error	--color-checks-donut-pending: #d29922;
1	Parse Error	--color-checks-donut-success: #2ea043;
1	Parse Error	--color-checks-donut-neutral: #8b949e;
1	Parse Error	--color-checks-dropdown-text: #c9d1d9;

The page looks correct, yet I get 1,114 errors in the css validator. I have tried:

- <https://github.com/ebcheez/web-231/blob/main/index.html> <= this gives the above error
- <https://github.com/ebcheez/web-231/index.html> <= this one gives the below error
- <https://github.com/ebcheez/web-231/blob/main/site.css> <= this gives the above error
- <https://github.com/ebcheez/web-231/site.css> <= this one gives the below error

**Target: <https://github.com/ebcheez/web-231/site.css>**

**I/O Error: <https://github.com/ebcheez/web-231/site.css>: Not Found**

I am curious. What does the “/blob/main/” represent? Every file shows this in the search bar. Directories show a /tree/main/ added to the path in the search bar in place of the /blob/main/. Eric

Assignment CSS Validator:

I was trying to use the "By URI" tab. I noticed the "By direct input" tab.

## W3C CSS Validator results for TextArea (CSS level 3 + SVG)

**Congratulations! No Error Found.**

This document validates as [CSS level 3 + SVG](#) !
