# 1_Week - NodeJS: Installation

Saturday, June 24, 2017   2:47 PM

Node.js installation and setup:

Windows Installation
1. Download Node.js from https://nodejs.org/en/. Select the "recommended version" and verify the Operating System (OS), including version, matches your systems OS.
2. Run the installation file
3. In the Welcome to Node.js Setup Wizard select "Next."
4. Read the "End-User License Agreement" and choose "I accept the terms in the License Agreement" and select "Next."
5. In the "Destination Folder" window, take note of the location (leave the default) and select "Next."
6. In the "Custom Setup" window leave the defaults and select "Next."
7. Select "Install"
    a. **Note: Windows may ask whether you want to allow the installer to make changes to your system, select "Yes"**
8. Once the installation is complete select "Finish"
9. Verify installation:
    a. Open a command prompt
    b. Type: node -v

```
C:\Users\rrkrasso>node -v
v6.11.0
```

10. Update the Node Package Manager (npm)
    a. Type: npm install npm -global
        i. **note: -global indicates the update applies globally**
    b. Wait for the update to finish
11. Setup is now complete
